Contents of Volume 66

Review

Stress hormones in Ménière's disease and acoustic neuroma.
Horner, K.C., and Y. Cazals 1

Articles

Cognitive correlates of ^{1}H MRS measures in the healthy elderly brain.
Ross, A.J., P.S. Sachdev, W. Wen, M.J. Valenzuela, and H. Brodaty 9

Pig brain stereotaxic standard space: Mapping of cerebral blood flow normative values and effect of MPTP-lesioning.
Andersen, F., H. Watanabe, C. Bjarkam, E.H. Danielsen, The DaNeX Study Group, and P. Cumming 17

Lower core body temperature and attenuated nicotine-induced hypothermic response in mice lacking the β4 neuronal nicotinic acetylcholine receptor subunit.
Sack, R., A. Gochberg-Sarver, U. Rozovsky, M. Kedmi, S. Rosner, and A. Orr-Urtreger 30

EEG effect of basal forebrain neuropeptide Y administration in urethane anaesthetized rats.
Tóth, A., L. Záborszky, and L. Détári 37

The AMPA-antagonist talampanel is neuroprotective in rodent models of focal cerebral ischemia.
Erdő, F., P. Berzsenyi, and F. Andrási 43

Intracisternal administration of chemokines facilitated formalin-induced behavioral responses in the orofacial area of freely moving rats.
Ahn, D.K., K.R. Lee, H.J. Lee, S.K. Kim, H.S. Choi, E.J. Lim, and J.S. Park 50

Anteroventral third ventricular *N-methyl*-D-aspartate receptors, but not metabotropic glutamate receptors are involved in hemorrhagic AVP secretion.
Yamaguchi, K., and K. Watanabe 59

Peripheral gustatory processing of sweet stimuli by golden hamsters.
Frank, M.E., B.K. Formaker, and T.P. Hettinger 70

Articles

Effects of ATP-sensitive potassium channel activators diazoxide and BMS-191095 on membrane potential and reactive oxygen species production in isolated piglet mitochondria.
Busija, D.W., P. Katakam, N.C. Rajapakse, B. Kis, G. Grover, F. Domoki, and F. Bari 85

Motherhood mitigates aging-related decrements in learning and memory and positively affects brain aging in the rat.
Gatewood, J.D., M.D. Morgan, M. Eaton, I.M. McNamara, L.F. Stevens, A.H. Macbeth, E.A.A. Meyer, L.M. Lomas, F.J. Kozub, K.G. Lambert and C.H. Kinsley 91

doi:10.1016/S0361-9230(05)00326-6

Gene expression profiling reveals the mechanism of action of anticonvulsant drug QYS.
Li, X., and Y. Hu 99

Dissociation of synaptic zinc level and zinc transporter 3 expression during postnatal development and after sensory deprivation in the barrel cortex of mice.
Liguz-Lęcznar, M., D. Nowicka, A. Czupryn, and J. Skangiel-Kramska 106

Effects of sleep disruption on rat dentate granule cell LTP in vivo.
Marks, C.A., and M.J. Wayner 114

Grape seed extract suppresses lipid peroxidation and reduces hypoxic ischemic brain injury in neonatal rats.
Feng, Y., Y.-M. Liu, J.D. Fratkins, and M.H. LeBlanc 120

Rapid and long-term plasticity in the neonatal and adult retinotectal pathways following a retinal lesion.
Serfaty, C.A., P. Campello-Costa, and R. Linden 128

Increased fiber outgrowth from xeno-transplanted human embryonic dopaminergic neurons with co-implants of polymer-encapsulated genetically modified cells releasing glial cell line-derived neurotrophic factor.
Ahn, Y.-H., J.-C. Bensadoun, P. Aebischer, A.D. Zurn, Å. Seiger, A. Björklund, O. Lindvall, L. Wahlberg, P. Brundin, and G.S. Kaminski Schierle 135

Changes in brain temperature and thermoregulation produced by destruction of medial septal neurons in rats.
Srividya, R., H.N. Mallick, and V.M. Kumar 143

A low-protein diet alters rat behavior and neurotransmission in normothermic and hyperthermic environments.
Lieberman, H.R., S.K. Yeghiayan, and T.J. Maher 149

Exploratory activity and motor coordination in wild-type *SOD1/SOD1* transgenic mice.
Lalonde, R., M. Le Pêcheur, C. Strazielle, and J. London 155

Effects of foreperiod duration on anticipatory postural adjustments: determination of an optimal preparation in standing and sitting for a raising arm movement.
Cuisinier, R., I. Olivier, and V. Nougier 163

Intelligence related upper alpha desynchronization in a semantic memory task.
Doppelmayr, M., W. Klimesch, K. Hödlmoser, P. Sauseng, and W. Gruber 171

Review

The role of female gonadal hormones in behavioral sex differences in persistent and chronic pain: Clinical versus preclinical studies.
Kuba, T., and V. Quinones-Jenab 179

Articles

Effects of laterality and sex on cognitive strategy in a water maze place learning task and modification by nicotine and nitric oxide synthase inhibition in rats.
Kanit, L., E.O. Koylu, O. Erdogan, and S. Pogun 189

Limits on recovery in the corticospinal tract of the rat: Partial lesions impair skilled reaching and the topographic representation of the forelimb in motor cortex.
Piecharka, D.M., J.A. Kleim, and I.Q. Whishaw 203

Partial resistance of ataxin-2-containing olivary and pontine neurons to axotomy-induced degeneration.
Viscomi, M.T., F. Florenzano, S. Amadio, G. Bernardi, and M. Molinari 212

Post-training intra-amygdala amphetamine injections given during acquisition of a stimulus–response (S–R) habit task enhance the expression of stimulus–reward learning: Further evidence for incidental amygdala learning.
Holahan, M.R., N.S. Hong, C. Chan, and R.J. McDonald 222

Glutamate stimulation of acetylcholine release from myenteric plexus is mediated by endogenous nitric oxide.
Milusheva, E.A., V.I. Kuneva, D.E. Itzev, N.I. Kortezova, B. Sperlagh, and Z.N. Mizhorkova 229

Characterization of efferent projections of chemosensitive neurons in the caudal parapyramidal area of the rat brain.
Ribas-Salgueiro, J.L., S.P. Gaytán, J. Ribas, and R. Pásaro 235

Diffusion and imaging properties of three new lipophilic tracers, NeuroVue™ Maroon, NeuroVue™ Red and NeuroVue™ Green and their use for double and triple labeling of neuronal profile.
Fritzsch, B., K.A. Muirhead, F. Feng, B.D. Gray, and B.M. Ohlsson-Wilhelm 249

Taurine-induced modulation of voltage-sensitive Na^+ channels in rat dorsal root ganglion neurons.
Yu, S.-S., K. Yu, Y. Gu, and D.-Y. Ruan 259

Special Issue

Evolution and Development of Nervous Systems
Proceedings of the 4th European Conference on Comparative Neurobiology
April 15–17, 2004, St. John's College, Oxford

Editorial

Introduction to the Proceedings of the Fourth European Conference on Comparative Neurobiology: Evolution and Development of Nervous Systems.
Molnár, Z., A.B. Butler, H.J. ten Donkelaar, L. Medina, and L. Puelles 269

Forebrain evolution

Connectivity and cytoarchitecture of telencephalic centers in the fire-bellied toad *Bombina orientalis*.
Mühlenbrock-Lenter, S., G. Roth, and W. Grunwald 270

Hallmarks of a common forebrain vertebrate plan: Specialized pallial areas for spatial, temporal and emotional memory in actinopterygian fish.
Broglio, C., A. Gómez, E. Durán, F.M. Ocaña, F. Jiménez-Moya, F. Rodríguez, and C. Salas 277

Establishing order at the systems level in mammalian brain evolution.
Manger, P.R. 282

The ascending tectofugal visual system in amniotes: New insights.
Guirado, S., M.Á. Real, and J.C. Dávila 290

Expression patterns of developmental regulatory genes show comparable divisions in the telencephalon of *Xenopus* and mouse: insights into the evolution of the forebrain.
Medina, L., A. Brox, I. Legaz, M. García-López, and L. Puelles 297

Thalamotelencephalic organization in birds.
Csillag, A., and C.M. Montagnese 303

Avian and mammalian "prefrontal cortices": Limited degrees of freedom in the evolution of the neural mechanisms of goal-state maintenance.
Güntürkün, O. 311

A new avian brain nomenclature: Why, how and what.
Reiner, A. 317

Lateral and medial amygdala of anuran amphibians and their relation to olfactory and vomeronasal information.
Moreno, N., R. Morona, J.M. López, M. Muñoz, and A. González 332

The "olfactostriatum" of snakes: A basal ganglia vomeronasal structure in tetrapods.
Martinez-Marcos, A., I. Ubeda-Bañon, E. Lanuza, and M. Halpern 337

Subpallial amygdala and nucleus taeniae in birds resemble extended amygdala and medial amygdala in mammals in their expression of markers of regional identity.
Yamamoto, K., Z. Sun, H.B. Wang, and A. Reiner 341

Neuronal synchronicity in the pigeon "prefrontal cortex" during learning.
Kirsch, J.A., and O. Güntürkün 348

Mapping auditory cortex in the La Plata dolphin (*Pontoporia blainvillei*).
Fung, C., A. Schleicher, T. Kowalski, and H.H.A. Oelschläger 353

Neuron numbers in sensory cortices of five delphinids compared to a physeterid, the pygmy sperm whale.
Poth, C., C. Fung, O. Güntürkün, S.H. Ridgway, and H.H.A. Oelschläger 357

Experimental study of the connections of the preglomerular nuclei and corpus mamillare in the rainbow trout, *Oncorhynchus mykiss*.
Folgueira, M., R. Anadón, and J. Yáñez 361

Motor systems

Cognitive and emotional functions of the teleost fish cerebellum.
Rodríguez, F., E. Durán, A. Gómez, F.M. Ocaña, E. Álvarez, F. Jiménez-Moya, C. Broglio, and C. Salas 365

Developmental changes of the GABA-immunoreactive fibers in the lamprey spinal cord.
Pombal, M.A., Y. Ruiz, M. Rodríguez-Alonso, M.C. de Arriba, V. Costas, R. Álvarez, and M. Megías 371

Visual orienting response in goldfish: a multidisciplinary study.
Torres, B., M.A. Luque, M.P. Pérez-Pérez, and L. Herrero 376

Comparative study of spinal motoneuron axon collaterals.
Chmykhova, N.M., V.O. Adanina, O.A. Karamian, V.M. Kozhanov, N.P. Vesselkin, and H.-P. Clamann 381

Brain development in vertebrates

Role of Pax6 in forebrain regionalization.
Manuel, M., and D.J. Price 387

The nuclear receptor COUP-TFI represses differentiation of Cajal-Retzius cells.
Studer, M., A. Filosa, and J.L.R. Rubenstein 394

Early regionalisation of the neocortex and the medial ganglionic eminence.
Bellion, A., and C. Métin 402

Otx genes in the evolution of the vertebrate brain.
Acampora, D., A. Annino, F. Tuorto, E. Puelles, W. Lucchesi, A. Papalia, and A. Simeone 410

Development of the cholinergic system in the brain and retina of the zebrafish.
Arenzana, F.J., D. Clemente, R. Sánchez-González, Á. Porteros, J. Aijón, and R. Arévalo 421

Expression domains suggest cell-cycle independent roles of growth-arrest molecules in the adult brain of the medaka, *Oryzias latipes*.
Candal, E., V. Nguyen, J.-S. Joly, and F. Bourrat 426

The tegmental proliferation region in the sea lamprey.
Villar-Cheda, B., X.M. Abalo, R. Anadón, and M.C. Rodicio 431

Semaphorin5A expression in the developing chick telencephalon.
Pineda, D., B. García, J.L. Olmos, J.C. Dávila, M.Á. Real, and S. Guirado 436

Distribution of GABA, calbindin and nitric oxide synthase in the developing chick entopallium.
Suárez, J., J.C. Dávila, M.Á. Real, and S. Guirado 441

Pallial expression of *Enc1* RNA in postnatal mouse telencephalon.
García-Calero, E., and L. Puelles 445

3D modelling, gene expression mapping and post-mapping image analysis in the developing human brain.
Sarma, S., J. Kerwin, L. Puelles, M. Scott, T. Strachan, G. Feng, J. Sharpe, D. Davidson, R. Baldock, and S. Lindsay 449

Dynamic pattern of mRNA expression of plasticity-related gene-3 (PRG-3) in the mouse cerebral cortex during development.
Wang, W.-Z., and Z. Molnár 454

Expression of calcium-binding proteins in the proliferative zones around the corticostriatal junction of rabbits during pre- and postnatal development.
Reblet, C., A. Alejo, T. Fuentes, P. Pró-Sistiaga, J. Mendizabal-Zubiaga, and J.L. Bueno-López 461

Distribution of nitric oxide-producing neurons in the developing and adult mouse amygdalar basolateral complex.
Olmos, J.L., M.Á. Real, L. Medina, S. Guirado, and J.C. Dávila 465

Subpallial origin of part of the calbindin-positive neurons of the claustral complex and piriform cortex.
Legaz, I., M. García-López, and L. Medina 470

Differential effects of ocular BDNF-injections onto the development of tectal cells characterized by calcium-binding proteins in pigeons.
Manns, M., and O. Güntürkün 475

The midbrain of sauropsides shares a common subdivision pattern defined by embryonic radial glia.
Delgado, A., A. Alonso, C. Damas, and C.Mª. Trujillo 479

Shared features of development across the bilateria

The evolution of homeobox genes: Implications for the study of brain development.
Holland, P.W.H., and T. Takahashi 484

A tripartite organization of the urbilaterian brain: Developmental genetic evidence from *Drosophila*.
Reichert, H. 491

Recasting developmental evolution in terms of genetic pathway and network evolution ... and the implications for comparative biology.
Wilkins, A.S. 495

The evolutionary origins of vertebrate midbrain and MHB: Insights from mouse, amphioxus and ascidian *Dmbx* homeobox genes.
Takahashi, T. 510

Outlining the nascent nervous system of *Branchiostoma floridae* (amphioxus) by the pan-neural marker *AmphiElav*.
Benito-Gutiérrez, È., M. Illas, J.X. Comella, and J. Garcia-Fernàndez 518

Aspects of brainstem neurobiology

Binaural interaction in the frog dorsal medullary nucleus.
Christensen-Dalsgaard, J., and M. Kanneworff 522

Extracellular matrix molecules and their possible roles in the regeneration of frog nervous system.
Matesz, C., L. Modis, G. Halasi, Z.M. Szigeti, S. Felszeghy, T. Bacskai, and G. Szekely 526

Connections of the superior vestibular nucleus with the oculomotor and red nuclei in the rat: An electron microscopic study.
Halasi, G., T. Bácskai, and C. Matesz 532

Chemoarchitecture of the dorsal column nucleus of the larval sea lamprey.
Rodicio, M.C., V. Villar-Cerviño, X.M. Abalo, B. Villar-Cheda, M. Meléndez-Ferro, E. Pérez-Costas, and R. Anadón 536

Chemoarchitecture of the vertebrate brain

Temporal and spatial organization of tyrosine hydroxylase-immunoreactive cell groups in the embryonic brain of an elasmobranch, the lesser-spotted dogfish *Scyliorhinus canicula*.
Carrera, I., C. Sueiro, P. Molist, S. Ferreiro, F. Adrio, M.A. Rodríguez, R. Anadón, and I. Rodríguez-Moldes ... 541

Comparative analysis of the distribution of choline acetyltransferase in the central nervous system of cyprinids.
Clemente, D., F.J. Arenzana, R. Sánchez-González, Á. Porteros, J. Aijón, and R. Arévalo 546

Calbindin-D28k immunoreactivity in the spinal cord of *Xenopus laevis* and its participation in ascending and descending projections.
Morona, R., N. Moreno, J.M. López, M. Muñoz, H.J. ten Donkelaar, and A. González 550

Colocalization of nitric oxide synthase and monoamines in neurons of the amphibian brain.
López, J.M., N. Moreno, R. Morona, M. Muñoz, and A. González 555

Development of the dopamine-immunoreactive system in the central nervous system of the sea lamprey.
Abalo, X.M., B. Villar-Cheda, R. Anadón, and M.C. Rodicio 560
